

Rating Action: Moody's Assigns long-term A2 Issuer Ratings to Sparebanken More

Global Credit Research - 30 Mar 2016

London, 30 March 2016 -- Moody's Investors Service has today assigned long-term A2 issuer ratings to Sparebanken More with a stable outlook. The ratings are in line with the bank's A2 long-term deposit ratings.

All other ratings and rating inputs of Sparebanken More are unaffected by today's action.

RATINGS RATIONALE

The A2 issuer ratings assigned to Sparebanken More take into account the bank's "Very High --" Macro Profile, its baa1 baseline credit assessment (BCA), the analysis of the bank's balance sheet structure through Moody's Advanced Loss Given Failure (LGF) framework, and the rating agency's assessment of the probability of government support. Norwegian banks benefit from operating in an affluent and developed country with very high economic, institutional and government financial strength, as well as low susceptibility to event risk.

The bank's BCA reflects the bank's continuously improved asset quality and its increased provision levels during 2015 leading to a coverage ratio significantly above rated peers, albeit exposed to cyclical industries and credit concentration. The issuer ratings also take into account Moody's LGF analysis of the bank's own volume of deposits and senior unsecured debt, as well as the volume of securities subordinated to them. This results in an assessment of very low loss given failure and leads to two notches of rating uplift for the issuer ratings which is the same uplift afforded for the bank's deposit ratings. Finally, Moody's assigns a "low" likelihood of government support in the event of its failure, based on the bank's regional market share and the significance of its main county of operation within Norway, leading to no uplift on the bank's preliminary ratings.

The stable outlook on the bank's issuer ratings reflects our view that the bank's financials will remain broadly resilient in the face of a modest slowdown in Norway's economic performance.

WHAT COULD CHANGE THE RATING UP/DOWN

An upgrade of Sparebanken More's ratings could be triggered by (1) continued good asset performance in its retail and corporate books, including in the more volatile segments; (2) continued good access to capital markets and further issuance of liquidity coverage ratio (LCR) eligible covered bonds, as well as improved liquidity, and/or; (3) stronger earnings generation without a material increase in risk profile.

Future downward ratings pressure could follow (1) an increase in the problem loans ratio significantly above Moody's system-wide expectation of approximately 2%; (2) financing conditions become more difficult and/or; (3) the bank's risk profile increases as a result of increased exposures to more volatile sectors, for example if commercial real estate concentration as a percent of Core Tier 1 Capital exceeds 150%, or if the quality of oil related portfolio deteriorates on the back of lower oil prices and/or (4) the macroeconomic environment deteriorates more than currently anticipated, leading to a lower macro profile and net profitability falling to below 0.4% of tangible assets. Also, a reduction in uplift as a result of our LGF analysis could lead to downward rating pressure.

REGULATORY DISCLOSURES

For ratings issued on a program, series or category/class of debt, this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support

provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

For any affected securities or rated entities receiving direct credit support from the primary entity(ies) of this credit rating action, and whose ratings may change as a result of this credit rating action, the associated regulatory disclosures will be those of the guarantor entity. Exceptions to this approach exist for the following disclosures, if applicable to jurisdiction: Ancillary Services, Disclosure to rated entity, Disclosure from rated entity.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Please see www.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on www.moodys.com for additional regulatory disclosures for each credit rating.
