Accounting Principles Group/Parent Bank

General

The Group's interim accounts have been prepared in accordance with International Financial Reporting Standards (IFRS), implemented by the EU as at 31.03.2011. The interim report has been prepared in compliance with IAS 34 Interim Reporting.

The Group presents its accounts in Norwegian kroner (NOK), which is also the Group's functional currency.

Please see the Annual report 2010 for further description of accounting principles. This interim report has been produced in accordance with the accounting principles applied to the annual accounts.

Consolidation

There have been no changes in consolidation principles resulting from compliance with IFRS. All transactions and intra-group balances involving companies which form part of the Group have been netted when consolidating the Group accounts. In the accounts of the Parent Bank, investments in subsidiaries are valued at cost.

Balance

Assets and liabilities are entered into the Group's accounts at the time when the Group obtains actual control of the rights to the asset or undertake an actual commitment. Loans being transferred to other institutions, but still guaranteed by the Bank, are booked in the Group's accounts.

Financial instruments

The Group's portfolio of financial instruments is classified, when first included in the accounts according to IAS 39, in one of the following categories, dependent upon the purpose of the investment:

- Financial assets held for trading purposes (trading portfolio)
- Other financial assets and liabilities assessed at market value, any value changes to be included in the profit and loss account
- Financial instruments which are held as available for sale assessed at market value, any value changes to be adjusted against the equity capital
- Loans and claims carried in the balance sheet at amortised cost

Financial assets in the trading portfolio

The Group's trading portfolio is assessed at market value through the profit and loss account. Please see the Annual Report 2010 for the Group's definition of a trading portfolio.

Financial assets and liabilities assessed at market value, with any value changes being included in the profit and loss account

The Group's portfolio of interest-bearing securities, fixed interest rate loans and -deposits are classified at market value, with any value changes being included in the profit and loss account.

Financial derivatives are shown in the balance sheet at market value, on a per contract basis, as assets or liabilities respectively.

Fixed interest rate loans are assessed at market value based on contract related cash flows discounted at the market rate of interest at the balance sheet date. Financial liabilities are classified as securities-related debt. Any securities-related debt incurred before 31.12.2006 is assessed at market value through the profit and loss account. In the case of the Bank's securities-related debt incurred after 31.12.2006, actual value-related hedging is applied, with any value changes being included in the profit and loss account. The difference between the initial cost and the settlement amount at maturity is amortised over the life of the loan. The portfolio of own bonds is shown as a reduction of debt.

Instruments held as available for sale, assessed at market value, with any value changes shown against equity capital

The Group's portfolio of shares, which are considered to be long-term investments, is classified as available for sale, with any value changes shown against equity capital. Realised gains and losses as well as writedowns are included in the profit and loss account during the period in which they occur.

Loans and claims carried in the balance sheet at amortised costs

All loans, including leasing, but with the exception of fixed interest rate loans, are assessed at amortised cost, based on expected cash flows. Write-down for credit losses is made when there are objective indications of a loan or a group of loans having been subject to impairment in value as a result of impaired creditworthiness. The write-down is calculated as the difference between the value as shown in the balance sheet and the present value of estimated future cash flows (including collateral), discounted at the original effective rate of interest for the loan in question (amortised cost).

Loans which have not been subject to specific assessment of impairment in value are assessed on a grouped basis.

The calculation of required write-down is made for customer groups with largely similar risk- and value characteristics and is based on risk classification and credit loss experience for the customer groups involved. Losses on loans are assessed in accordance with Norwegian regulations regarding loans and guarantees within credit institutions.

Pension commitments

The largest portion of the Group's pension scheme is defined-benefit, which entitles employees to agreed future pension benefits. This scheme was closed to new members beginning on 1 January 2010. (From 2010 new employees enter into the Group's defined contribution scheme). Otherwise see the Annual Report 2010 for a detailed description of the Group's pension schemes.

Fixed assets

The Group mainly owns its own buildings, and the main purpose of these buildings is to be used in connection with the operations of the Bank. These buildings are thus defined as fixed assets and not investment properties in the Group's accounts. The buildings are evaluated at historical cost price, less accumulated depreciation and write-downs. Other fixed assets are evaluated at historical cost price and depreciated according to their expected lifetime.

In case of indications of booked value being higher than retainable amount, fixed assets are assessed for write downs. Retainable amount is the larger of the assets utility value and the assets market value, less costs of sale.

Tax

Taxation cost throughout the year is being periodised in line with the estimate of the Group's yearly taxation cost. Estimated taxation cost for the Group is amounted to 29 per cent of pre-tax result.

Equity and capital adequacy ratio

Dividend and donations confirmed after the balance sheet date are shown as equity capital until approved by the Board of Trustees. The amounts are thereafter shown as debt in the balance sheet until being distributed. Amounts set aside for dividend and donations are not included in the calculation of the capital adequacy ratio. Capital adequacy calculations are carried out according to the Standardised Approach in Basel II.

Staff benefits

All wages, salaries and other remuneration to employees in the Group and other appropriate parties have been charged to the profit and loss account as costs and have been paid at the end of the accounting period. As at 31.03.2011, the Bank had no liabilities relating to the Bank's CEO, members of the Board of Directors or other employees involving special compensation on termination of employment or changes in employment or the jobs and positions in question. Furthermore, there are no arrangements or accounts-related liabilities relating to bonuses, profit sharing, options, subscription rights or similar for the abovementioned persons. Reference is made to the Annual Report 2010 for description of benefitsrelated pension schemes for the Bank's CEO and other employees.

The market value of the instruments traded on an active exchange are based on traded price on the balance sheet date. In the case of the financial instruments that are not traded on an active exchange, own valuations are used which are based on current market condi-

tions or alternatively other valuations from another market player. In the case of unlisted equities where one cannot adequately reliably measure fair value, the acquisition cost or written-down book value shall be used.
